

## **Four Ace Triumph Trick**

4 aces & 16 cards

Put the aces, one at a time, face-up, into the face-down pack of 16 cards

Shuffle the cards

Deal 10 cards into a pile. Put the remaining card 6 inches away, on the table.

Turn one pile over.

Do a perfect shuffle of the cards.

Cut the cards and complete the cut, as many times as you want.

Deal out all the cards into four piles.

Then do either of these two options:

1) The flip-flop shuffle version:

-pick up the first pile, turn it over, slap it down on the second pile

-pick up the second pile, turn it over, slap it down on the third pile

-pick up the third pile, turn it over and slap it down on the fourth pile

or

2) The riffle shuffle version

Put pile 1 & 3 together, and put pile 2 & 4 together.

Turn one pile over.

Riffle shuffle or just push the two piles together.

Snap your fingers or wave your hands over the cards.

Spread the cards out, revealing only the aces are reversed.
